

SERVICES OVERVIEW

IT STAFFING & CONSULTING

With rapid changes in technology and IT-related unemployment near all-time record lows, companies today are finding it increasingly more challenging to attract and retain highly skilled IT professionals to design, implement, manage and safeguard their systems from cyber threats. In response to this demand, our team at StevenDouglas is helping clients navigate this rapidly changing job market and delivering top IT talent.

In an ever-changing world of technology, businesses are increasingly looking to hire IT professionals on an interim or contract to hire basis. Our IT Staffing & Consulting Division helps these businesses by providing talented IT consultants in a staff augmentation setting.

Whether a company is upgrading their systems, adding personnel bandwidth for special projects, or backfilling critical IT roles, our team of seasoned professionals can leverage their strong business experience and deep network to deliver superior talent and strategic value with an interim or right-to-hire approach.
